

Welcome to your Contact Lens Fitting at PineCone Vision Center

Our doctors are proud to offer the latest contact lens options to treat nearsightedness, farsightedness, astigmatism, presbyopia, and irregular corneal surfaces. You have unique ocular and visual needs and our doctors will choose lens options based upon these needs. To ensure your optimal lens selection, the doctors will use technology to measure your refractive error, shape of your eye and perform a detailed evaluation of the health of the surface of your eye and tear layer. These tests are in addition to your routine eye exam and may not be covered by your insurance. A contact lens fitting fees of \$65 for a standard fit and up to \$500 for a specialized fit are due at the time of service. The standard contact lens fitting fee includes diagnostic sample lenses, necessary contact lens solutions, and up to three months of care to ensure the optimal fit. If this is your first time in this particular type of lens or you haven't worn lenses for quite some time, a one-on-one contact lens class will be scheduled. There is an additional \$25 fee for a twenty minute class. Service fees are non-refundable. Specialty lenses are subject to a restocking fee. A contact lens prescription will be released after completion of a successful fit.

**We Thank You for Choosing PineCone Vision Center,
We look forward to caring for you.**
